Magnachip Reports Results for First Quarter 2026**Q1 Results Summary**

- Consolidated revenue from continuing operations (which includes Power Analog Solutions (“PAS”) and Power IC (“PIC”) businesses) was \$46.2 million, approximately at the mid-point of our guidance range of \$44.0 to \$48.0 million.
- Revenue grew by 3.3% year over year and 13.9% quarter over quarter.
- Consolidated gross profit margin from continuing operations of 15.6% was above the mid-point of our guidance range of 14.0% to 16.0%.

Recent Highlights

- Launched 8th-generation ultra low- $R_{ss(on)}$ 12V BatteryFET designed for smartphone battery power efficiency
- Launched 8th-generation 40V and 60V MV MOSFETs for servers and high-performance PCs
- On track to launch 55 new-generation products in 2026

SEOUL, South Korea, Apr. 28, 2026 – Magnachip Semiconductor Corporation (NYSE: MX) (“Magnachip” or the “Company”) today announced financial results for the first quarter 2026.

Camillo Martino, Magnachip’s CEO said, “We delivered better-than-seasonal revenue growth in the quarter, reflecting both solid execution and also the impact of the previously communicated inventory and channel actions. We are comfortable with our progress toward our multi-year transformation, and we are showing some good early signs, particularly with the 55 new-generation products launched in 2025. Our focus remains on improving product competitiveness through an accelerated pace of new-generation product launches, which we believe will drive sustainable revenue growth, margin expansion, and improved utilization over time. We believe disciplined execution of our six-pillar strategy will deliver long-term shareholder value.”

Shinyoung Park, Magnachip’s CFO, commented, “We remain committed to financial discipline to significantly improve our financial performance during this multi-year transformation.”

- (1) Management believes that non-GAAP financial measures, when viewed in conjunction with GAAP results, can provide a meaningful understanding of the factors and trends affecting our business and operations and assist in evaluating our core operating performance. However, such non-GAAP financial measures have limitations and should not be considered as a substitute for net loss or as a better indicator of our operating performance than measures that are presented in accordance with GAAP. A reconciliation of historical GAAP results to non-GAAP results is included in this press release.

Q2 2026 Financial Guidance

While actual results may vary, Magnachip currently expects the following:

- Consolidated revenue from continuing operations (which includes Power Analog Solutions and Power IC businesses) to be in the range of \$44.5 million to \$48.5 million, roughly flat sequentially and a decrease of 2.3% year-over-year at the mid-point. This compares with \$46.2 million in Q1 2026 and \$47.6 million in Q2 2025.
- Consolidated gross profit margin from continuing operations to be in the range of 17% to 19%, up from 15.6% in Q1 2026 but down from 20.4% in Q2 2025.

Q1 2026 Earnings Conference Call

Safe Harbor for Forward-Looking Statements

Information in this press release regarding Magnachip's forecasts, business outlook, expectations and beliefs are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 that involve risks and uncertainties. These statements include expectations about estimated historical or future operating results and financial performance, outlook and business plans, including second

quarter 2026 revenue and gross profit margin expectations, future growth and revenue opportunities from new and existing products and customers, and the timing and extent of future revenue contributions by our products and businesses. All forward-looking statements included in this release are based upon information available to Magnachip as of the date of this release, which may change, and we assume no obligation to update any such forward-looking statements. These statements are not guarantees of future performance and actual results could differ materially from our current expectations. Factors that could cause or contribute to such differences include, among others: the impact of changes in macroeconomic conditions, including those caused by or related to recent trade and tariff actions announced by the U.S. globally and the related retaliatory tariffs and disruptions in supply chains and global trade as a result thereof, inflation, potential recessions or other deteriorations, economic instability or civil unrest; geopolitical conflicts, including between Russia and Ukraine and between Israel, the United States and Iran and sustained military action and conflict in the Red Sea, including fuel supply disruptions and rising energy costs related thereto; disruptions or economic impact resulting from United States government shutdowns; manufacturing capacity constraints or supply chain disruptions that may impact our ability to deliver our products or affect the price of components and impact demand for our products from customers; the impact of competitive products and pricing; timely acceptance of our designs by customers; timely introduction of new products and technologies; the potential impact of emerging technologies such as artificial intelligence on industry dynamics, customer demand, supply chain operations, and regulatory environments; our ability to ramp new products into volume production; industry-wide shifts in supply and demand for semiconductor products; overcapacity within the industry or at Magnachip; effective and cost-efficient utilization of manufacturing capacity; financial stability in foreign markets and the impact of foreign exchange rates; unanticipated costs and expenses or the inability to identify expenses that can be eliminated; compliance with U.S. and international trade and export laws and regulations by us, our customers and our distributors; change to or ratification of local or international laws and regulations, including those related to environment, health and safety; public health issues; other business interruptions that could disrupt supply or delivery of, or demand for, Magnachip's products; and other risks detailed from time to time in Magnachip's filings with the SEC, including our Form 10-K filed on March 16, 2026, and subsequent registration statements, amendments or other reports that we may file from time to time with the SEC and/or make available on our website. Magnachip assumes no obligation and does not intend to update the forward-looking statements provided, whether as a result of new information, future events or otherwise.

We present Adjusted EBITDA from continuing operations and Adjusted Loss from continuing operations as supplemental measures of our performance. We define Adjusted EBITDA from continuing operations for the periods indicated as EBITDA – continuing operations (as defined below), adjusted to exclude (i) Equity-based compensation expense, (ii) Foreign currency loss, net and (iii) Derivative valuation loss (gain), net. EBITDA – continuing operations for the periods indicated is defined as loss from continuing operations before interest income, interest expense, income tax benefit, net and depreciation and amortization.

We prepare Adjusted Loss from continuing operations by adjusting loss from continuing operations to eliminate the impact of a number of non-cash expenses and other items that may be either one time or recurring that we do not consider to be indicative of our core ongoing operating performance. We believe that Adjusted Loss from continuing operations is particularly useful because it reflects the impact of our asset base and capital structure on our operating performance. We define Adjusted Loss from continuing operations for the periods as net loss, adjusted to exclude (i) Equity-based compensation expense, (ii) Foreign currency loss, net, (iii) Derivative valuation loss (gain), net and (iv) Income tax effect on non-GAAP adjustments.
